

Program

Continuing Education Symposium For Veterinary Technicians

Sunday, November 17th, 2024
ACCESS – Pasadena
2570 E Foothill Boulevard, Pasadena, CA 91107

Welcome

At ACCESS Specialty Animal Hospitals, we believe that continuing education for veterinary technicians is more than just a career requirement—it's an opportunity to grow both personally and professionally.

In a field where veterinary medicine is constantly advancing, staying up to date allows technicians to offer the best possible care to every patient.

Continuing education is about mastering new techniques, embracing the latest technology, and gaining the confidence to make a real difference. Ongoing education doesn't just open doors to exciting career advancements—it also strengthens the bond between the technician, their team, and the pets they love caring for.

By investing in knowledge, technicians are not only improving their skills—they're helping create healthier, happier lives for the pets who depend on them.
