### Center for Advanced Veterinary Interventions™

At our Center for Advanced Veterinary Interventions (CAVI™), board-certified doctors use advanced, image-guided technology – including fluoroscopy (real-time X-ray guidance), endoscopy (tiny cameras that see inside the body), ultrasound, cardiac imaging, and Computed Tomography (CT) to treat complex medical conditions with precision and care.

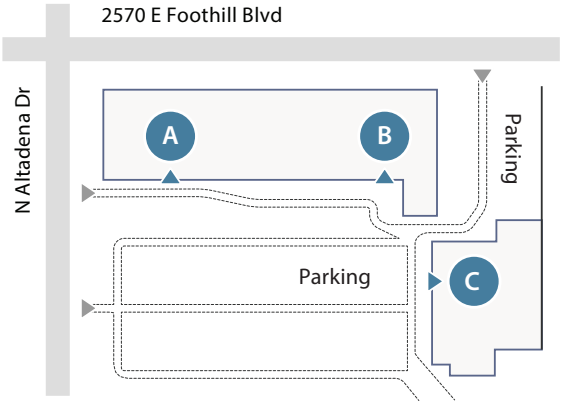
We understand that when you refer a patient to ACCESS Pasadena, you're placing your trust in us, something we take seriously with a commitment that goes beyond advanced veterinary care.

- Patients receive expert attention from board-certified specialists, experienced staff doctors, and skilled technicians, **all collaborating for the best outcomes.**
- We're committed to the compassionate client care you'd expect from a specialty hospital **privately owned by local veterinarian**s – less red tape, more heart.
- Everything is **'under one roof,'** so there are no stressful transfers. If overnight care is needed, our team is here.
- With **next-gen technology**, we provide precise diagnostics, safer treatments, and faster recoveries.

For further information on how we can assist you, your patients, and their owners, don't hesitate to contact us today. We are here for you.



### Our Campus
